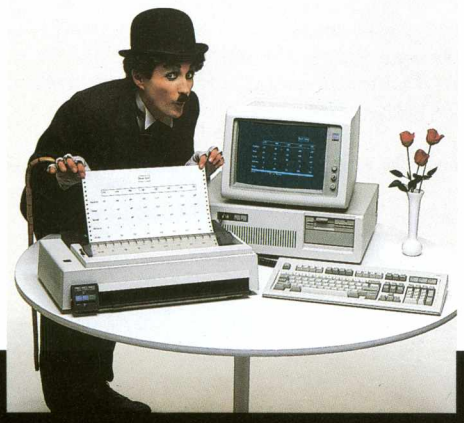
IBM Proprinter XL



The multipurpose, multifunction printer for wide carriage applications

Versatile wide-carriage printing

If you need an affordable, multifunction dot matrix printer that can handle spreadsheets and other wide-carriage applications, you'll want to know more about the IBM Proprinter XL.

The IBM Proprinter XL offers simplified handling of both standard and wide-form paper, while enabling you to print text and graphics at a variety of speeds in many different pitches and type styles. The unit can even print both text and graphics on the same line.

For added ease of use, the IBM Proprinter XL has a convenient control panel. The panel is located on the front of the printer for easy accessibility. It lets you switch from one print mode to another without requiring any programming skills.

Flexible, simplified paper handling

The IBM Proprinter XL's wide carriage allows you to handle virtually any business or personal application. The IBM Proprinter XL has a 13.6 inch print line and will accept continuous forms up to 15 inches wide and cut sheets up to 16.5 inches wide. Both continuous forms and cut sheets can have as many as four parts.

Other features further assist paper handling. A front-loading slot lets you insert nearly any type of cut sheets or envelopes without removing your continuous forms. An adjustable paper guide helps ensure correct insertion, and an adjustable paper lever allows for varying forms thickness.

The IBM Proprinter XL also has a unique power-assisted paper loading feature. When you want to insert a new supply of continuous forms paper or cut sheets in the front feed, the power loader turns the feed mechanism slowly until the paper is positioned at the first print line. By eliminating the need to advance the carriage manually, this feature frees your hands, so you can load the paper accurately.

And the IBM Proprinter XL's document-on-demand capability enables you to remove printed continuous forms without wasting paper.

Printing speeds to meet many application requirements

The IBM Proprinter XL offers sharp, clear bidirectional printing at several speeds to meet varied user needs.

The IBM Proprinter XL can print at a maximum rate of 200 characters per second in data processing mode, 100 characters per second in emphasized mode, and 40 characters per second in near letter quality mode.

To increase operator productivity further, you can also choose an optional 8K buffer. This allows you to use your personal computer while the Proprinter XL continues to print.

Printing tailored to the task

The IBM Proprinter XL provides many features that allow you to customize your printing. The unit's operator control panel, for example, lets you select near letter quality, condensed and emphasized printing, as well as double high and double wide characters, 12 or 10 characters per inch proportional character spacing. When printing in data processing mode, you can even use the panel to activate the IBM Proprinter XL's "quiet" feature.

The IBM Proprinter XL also includes a large 256 character buffer for downloadable fonts. That means you can download characters and character sets of your own design–such as logotypes or letterheads–from a host computer for printing in any of the printing modes.

For further flexibility, the IBM Proprinter XL can support software selectable margins, as well as printing of superscripts, subscripts, Greek and math symbols, box and line drawing characters, underscores and overscores...and much, much more.

Neat, clean ribbon installation and efficient operation

The IBM Proprinter XL uses a black nylon fabric ribbon in a cartridge designed for "clean hands" installation. In data processing mode, the IBM 4202 Proprinter XL Ribbon provides approximately four million characters.

For use with a variety of hardware and software products

The IBM Proprinter XL is compatible with a wide range of hardware and software products. For instance, the unit's parallel interface enables attachment to IBM Personal Computers and other personal computers with a compatible interface. For maximum versatility, there's an optional asynchronous serial interface for connecting the Proprinter XL to certain other non-IBM personal computers.

The IBM Proprinter XL can also operate with many popular IBM and non-IBM software applications.* With its wide carriage and versatile multispeed text and graphics printing features, the IBM Proprinter XL can perform virtually any printing task your software can give it.

So ask for a demonstration today.

That way you can see for yourself just how versatile, fast and convenient the IBM Proprinter XL can be.

Specifications

Weight:	23.6 lbs. (9.00kg)
Width:	22.6″ (574mm)
Depth:	14.3″ (363.2mm)
Height:	5.25″ (133.4mm)
Nominal Power:	120 vac., 1-phase 60 Hz
Acoustics:	60 dBA
Paper Width:	3-15″ (76.2-381mm) continuous forms 3-16.5″ (76.2-419.1mm) cut sheets
Paper Length:	3″ (76.2mm) minimum, continuous forms and cut sheets
Paper Weight:	Single part: 12-24 lbs. Multipart: 1-3-part forms: 10-15 lbs. (.0019″-.0023″ thickness) 4-part forms: 10-12 lbs. (.0019″-.0023″ thickness)
Graphics:	816, 1,632 and 3,264 dots per 13.6″ horizontal line
Interface:	IBM Personal Computer Parallel Interface (standard) Asynchronous Serial Interface Module (optional)
